

8 June

Mr. Clarke,

25X1A

[ ] called me this afternoon and asked the status of the Fifteen Year Plan - - he explained that Col. White had the feeling, based on a Director's Staff Meeting of last week, that he should be concentrating on racking up his long-range plans and programs.

I explained your recent attempts to get clarification of the situation, including Bross' absence and other complications. [ ] nevertheless feels that we should somehow or other find out just what the DCI thinks is going on - i. e. who is supposed to be doing what and with which and to whom? As he puts it, he has a whole bunch of support officers steamed up to do something and then the bottom falls out.

25X1A

I think that [ ] concern is legitimate and that somebody might find himself orally attached to a nether teat one of the days real soon. Perhaps you can get to Mr. Helms and find out if you are on the spot, or just who is.

*How*
